Key Highlights

Automation Excellence

Reduced regression testing time by **60%** through strategic automation implementation and framework development.

Performance Testing

Conducted comprehensive performance testing using Grafana k6 to uncover and resolve critical system bottlenecks.

Full-Stack Testing

Designed and developed automation solutions for API, mobile, and web applications across multiple platforms.

100% API Coverage

Achieved complete API test coverage for fintech systems, ensuring robust and secure financial transactions.

Team Leadership

Built and led high-performing QA teams from scratch, driving efficient and quality-focused software releases.

Early Detection

Proactively analyzed requirements to enable shift-left testing approach and early defect detection.

CI/CD Integration

Implemented automated testing in CI/CD pipelines using Jenkins and GitHub Actions for continuous quality assurance.

Quick Learner

Rapidly adapt to new tools, technologies, and domains with minimal learning curve and immediate impact.

Test Planning & Closure

Expert in accurate test effort estimation, timeline planning, and streamlining test closure processes with comprehensive reports and continuous improvement documentation.

Notable Projects

CURRENT PROJECTS

Showcase.space – Property Presentation Platform

LIVE

WEB

Innovative and immersive digital display suite software powering LED walls, immersion rooms, and interactive experiences for Australia's biggest property developers. Features include 3D buildings, virtual walkthroughs, and model lighting integration.

Leasey – Commercial Lease Management

LIVE

WEB

Comprehensive commercial lease management platform designed to streamline property leasing processes, tenant management, and automated lease administration for commercial real estate agents.

POCKET eWallet – Digital Wallet & Fintech

LIVE

MOBILE

Comprehensive digital wallet solution offering secure money transfers, bill payments, mobile recharges, and financial services. Built complete QA infrastructure, achieved 100% API test coverage, and reduced regression time by 60% through automation.

Google Play

App Store

TIZEN – OS by Samsung

LIVE

MOBILE

Open and flexible operating system built for mobile and connected device ecosystem. Contributed to quality assurance for Samsung's proprietary mobile operating system.

Tizen Studio By Samsung

LIVE

WEB

Comprehensive development environment providing tools for creating Tizen native and web applications. Ensured quality through extensive testing of IDE features and development tools.

Dassault CATIA v6

LIVE

WEB

3DEXPERIENCE platform enabling virtual modeling of enterprises. Performed comprehensive testing including automation, regression, and quality assurance for this powerful CAD solution.

**Education**

University of Information Technology & Science

 Dhaka, Bangladesh

 May 2011 - April 2016

Bachelor of Science (B.Sc.)

Electrical and Electronic Engineering (EEE)

Professional Certifications

ISTQB Certified Tester

International Software Testing Qualifications Board

ISTQB-CTFL

November 2021

Foundation Level certification demonstrating core testing principles, techniques, and best practices.
